Start Here

Consider your learning goals first before selecting a technology task or tool. Guiding Questions:

- 1. What is your Standard or Learning Target?
- 2. What is the best way to teach this content or skill? What is the most effective teaching strategy?
- 3. What technology resources will enhance this lesson? (Should increase the rigor of the lesson)

Contact an expert.
Find resource from outside state/country.
Class creates a documentary video.
Create art collaboratively electronically.

Create a multimedia project. Student voice/choice in task completion.

Publish to an authentic audience.
Pull or scan in a background as a canvas in a digital drawing.
Receive peer feedback on ongoing discussion on an electronic piece of

writing.

Share a Doc.

Take an online quiz.

Participate in online class
discussion.

Grade and return an assignment online

Peer editing of Use a tool that be played back work in group Presentation.

Peer editing or teacher feedback.
Use a tool that allows creation to be played back.
Work in groups to create a Google

Tech allows for significant, task

Work in groups to create a Google Presentation.

Turn assignment in online. Add a picture to a document. Use a digital drawing program.
