

North Boone CUSD Summer School Proposal

General Education Summer School

1. Target Students: Current Kindergarten and 1st grade students from all elementary buildings that were identified as significantly below grade level expectations. Recommendations were determined by academic performance, not a ratio per building. There will be one Kindergarten class and one 1st Grade class, each enrolling a maximum of 15 students.
2. Staffing: Each class will be staffed by one certified teacher and one teacher assistant. A building administrator, school nurse, and secretary will be hired for this program as well as the EL and ESY Programs taking place concurrently.
3. Program Curriculum: Scholastic Lit Camp: A 5-week program that combines innovative, research-based curricula with an engaging and interactive summer camp structure geared to improve literacy skills, motivation, curiosity, and encourage students to become lifelong readers and learners.
4. Program Structure: The program will be five weeks in length with students attending Camp for three hours per day, four days per week. Teachers will have 30 minutes of planning and preparation each day.

English Language Learners (ELL) Summer School

1. Target Students: Current Kindergarten through fourth grade students receiving services through the District ELL program. All EL Students receiving services will receive an invitation to attend. There will be two classes, one for primary-age students and the other with elementary-age students, each enrolling a maximum of 20 students.
2. Staffing: Each class will be staffed by one certified ESL teacher and one bilingual teacher assistant. One teacher will focus on Math instruction and the other on ELA instruction. A building administrator, school nurse, and secretary will be hired for this program as well as the GenEd and ESY Programs taking place concurrently.
3. Program Curriculum: Students will be exposed to approximately 80 minutes of ELA and 80 minutes of Math. The math classroom will give students exposure to "Math Talks." They will be given a photograph where they will be verbally expressing and writing about math questions in the photograph. The class will have an emphasis on vocabulary words for solving word problems. In the ELA classroom, students will participate in leveled small group reading and write about what they learn. Word work, or phonics instruction, will focus on English spelling patterns, prefixes and suffixes. Students will also participate in oral language exercises putting their new vocabulary into action.

4. Program Structure: The program will be five weeks in length with students attending for three hours per day, four days per week. Teachers will have 30 minutes of planning and preparation each day.
5. District costs: The ELL Summer Program is funded entirely through the Title III Grant. See attached budget sheet.
