

ATTACHMENT NO. V-B: E-Learning Plan

Potential motion: Move to Approve the E-Learning Plan

Recommended action: Approve as Presented

I am recommending moving to E- Learning instruction to begin for students September 8, 2020. After long hours of planning, meetings with various stakeholders of interest, and numerous conversations, E-Learning should be the plan we move forward with in fall. The overall reason for this is for the health and safety of our students and staff. I am so appreciative of the work that has gone into our three plans and want to thank everyone for that. I believe that in-person instruction is the best overall method, but feel at this time E-Learning keeps our students, staff and families the safest. The virus positivity rate continues to rise and can intensify quickly and expose many people rapidly. With E-Learning we can minimize that risk, increase our safety, and keep the continuity of instruction. I would recommend that this plan be used until our Winter Break in December at which time we can re-evaluate the safety of in-person instruction. We will be using the month of August to work with all staff for training, planning and collaboration.
