

ATTACHMENT NO. V-B: Hiring of District Maintenance Repair Person

Suggested Motion: Move to approve the Hiring of District Maintenance Repair Person

Recommended Action: Approve the motion.

Background

We are asking for the Board to approve the hiring of a District Maintenance and Repair Person. The need for the position has been presented at the facilities meeting for discussion and is intended to help keep costs contained on maintenance and repair needs throughout the district. Having our own employee will save the district from contracting services out that could be done in house. The position would be a full time salary based on the qualified applicant's experience.

Goals

- Improve the overall appearance and functionality of the buildings in the North Boone School District.
- Use of District Maintenance Repair Person to perform tasks in the district as opposed to contracting the services which can lead to potential cost savings.

Potential Savings & Expenses

In the last 12 months (April 2019-March 2020), North Boone has spent over \$700,000 in purchased services for Operations and Maintenance. These services include but are not limited to electrical, HVAC, snow plow removal, roofing repairs, septic and plumbing, fire alarm and security alarm maintenance and repair. There are projects and repairs that have to be done with a contracted agency but the District anticipates that some of the PM, repairs and troubleshooting could be done in house by the District Maintenance Repair Candidate.

In an effort to project savings to the District, purchased service invoices for Operations and Maintenance were pulled and reviewed for those services that could have potential savings by the hiring of a District Maintenance Repair Person. Due to unknown factors such as qualifications and skill set of the potential candidate these potential savings are only an estimate. This estimate is conservative and has the potential to grow over time.

Potential savings \$37,000

Please see attached documentation for more specifics regarding these cost savings. The savings could be more sustainable if the candidate has any electrical or HVAC experience.

There will be initial expenses when this position is hired such as tools and training. There will be a budget of \$1,500 for tools and \$1,000 for any additional training.

North Boone

Community Unit School District 200

JOB DESCRIPTION – NON-CERTIFICATED

Position: District Maintenance Repair Person

Reports to: Director of Facilities

Qualifications:

1. High School Diploma
2. Experience in commercial or industrial building systems maintenance position
3. Mechanical ability or experience in automotive or small engine mechanics
4. Ability to implement directions and work with minimal supervision
5. Able to move and lift objects at least fifty pounds
6. Valid Illinois driver's license CDL preferred.

Terms of Employment: 12 months

General Responsibilities: duties include, but are not limited to, electrical wiring; lighting and component installation and repair; stick and metal gas welding; heating, cooling, ventilating installation and repair; school facility plumbing installation and repair; general carpentry installation and repair; general painting; snow removal; glass and window installation and repair; and any other buildings and grounds maintenance functions that are requested by individual district facilities. Cooperates with all certified and non-certified personnel, students and parents.

Performance Responsibilities

1. Completes all assigned duties in a timely and professional-like manner.
2. Cleans up after work assignment has been completed.
3. Completes work order form as to time spent, material used, and documents any additional information that may be required.
4. Uses safe work practices on all projects to protect himself/herself and all other building occupants including students, teachers, and others who may have use of our buildings and grounds.
5. Reports any needed repairs or unsafe conditions to the Building Principal, and then Director of Facilities.
6. Must be capable of operating all District-owned vehicles and equipment, and must have valid and current Illinois driver's license.
7. Must be knowledgeable and capable of operating a wide variety of electrical and gasoline powered tools and equipment.
8. May be required to perform custodial duties when needed.
9. Follows all school rules and board policies.
10. May be required to supervise the conduct of part-time employees assigned as helpers during the course of any projects.
11. Develops and assists with a district preventative maintenance program/system.
12. Avails himself/herself for snow removal as needed by the Director of Facilities.
13. Must be capable of supporting or lifting up to 50 pounds.
14. May be required to work off shift hours on emergency calls.

15. Performs other related duties and tasks as may be assigned by the Director of Facilities

Terms of employment: 260 days (twelve months) 8 hours per day

Salaried Position

12 Sick days and 4 Personal Days

Eligible for Vacation Days

Evaluation:

By the Director of Facilities
