

ILLINOIS YOUTH SURVEY

2014 District Report

North Boone CUSD 200

Data collected Spring 2014

Introduction

Congratulations! Based on your administration of the Illinois Youth Survey (2014), this report provides data on a variety of health and social indicators including drug use, bullying, school climate and much more. Your data has been organized into topical sections as noted in the table of contents on the next page. To help you get started using your data, here are a few suggestions:

Review the table below to determine how widely your students participated in the survey. If the “% of Enrolled Students Reported” is **at least 50% for each grade level**, you can be more confident that the data in your report is representative of your total student population.

There will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** (in the column “N Students Surveyed”). This is to protect the confidentiality of your students.

Comparison of Students Surveyed with Enrollment

	N Students Surveyed	N Enrolled Students	% of Enrolled Students Reported
6th	103	130	79%
8th	121	144	84%
10th	115	127	91%
Total	339	401	85%

Keep in mind that the IYS 6th and 8th grade forms do not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables and charts for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on our website <http://iys.cprd.illinois.edu/home/results>.

Tables can be helpful when you are looking for a summary of responses for particular survey questions, for example, the percentage of 8th grade youth who report using prescription pain killers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an “N” (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an “**N/A**” (**Not Applicable**) noted in a table, this indicates that the question was **not asked at that grade level**. If you see an “**N/R**” (**Not Reported**) noted in a table, this indicates that *at least 90% of students skipped the question for no known reason*, making the results too biased to report.

Summary charts can be helpful to view multiple questions in one place (e.g., use of different drugs to determine which is the most used) and to compare your results with the scientific sample of Illinois students who participated in the 2012 IYS. State level results from the 2014 IYS will not be available until late fall. IYS state level norms from 2012 are a good benchmark for immediate decision-making because state estimates stay relatively stable across two IYS administration years. To locate the starting page of your Summary Charts, refer to the Table of Contents on the next page.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about your report, please call 888-333-5612 and ask for an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.

Summary Charts

Summary charts provide a snapshot of selected health and social indicators. All charts provide grade-level data. Some charts illustrate comparisons between one grade level of *Your Students in 2014* with the same grade level in a statewide random sample of *Illinois Students in 2012* (as noted in the introduction to your report). Other charts provide a comparison of *Your Students in 2014* across all grades surveyed to easily surface developmental trends. *Please note that there was no 6th grade state sample in 2012, therefore no charts will display 2012 state data for 6th graders.*

Your report may not contain the full array of charts listed below. As noted in the introduction to your report, there will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** in order to protect the confidentiality of your students. In addition, the IYS 6th and 8th grade forms contain a subset of the questions asked on the IYS high school form. As a result, some of the charts listed below may not be included in your report. Information about the availability of grade-specific charts or data is defined for each chart below. If an item within a chart is not displayed for a grade level (most often 6th and 8th grades), a footnote is included on the chart to explain.
