

# Consortium for Educational Change Proposal

North Boone Business Meeting  
June 2021

It is recommended that the Business Committee review the Consortium for Educational Change multi-year proposal. North Boone has been working CEC over the past few years on projects such as the math audit and currently with team building and school improvement.

The pandemic has brought unique challenges and opportunities for North Boone. One of the opportunities is extra funding through the ESSER grant to focus on student learning loss. We would like to pair with CEC to begin the process of evaluating our MTSS systems and structures. MTSS is a framework that schools use to provide support to students. The focus of MTSS is to provide high quality, research-based instruction to meet the academic and social-emotional needs of students.

In the proposal, year one will focus on reviewing the district current systems and structures as well as planning with district leadership and the District MTSS Team. Years two through four will be used to incorporate the systems and structures district wide. We would like the business committee to consider the multi-year proposal for approval at the June Board meeting. The total cost is estimated at \$114,800 and would come from ESSER grant funds. If approved, work would begin this summer.

Along with working with CEC for the MTSS process, North Boone would like to continue to work with CEC on school improvement and team building.
