Timecard Vendor

North Boone is looking to streamline the timecard and payroll process by utilizing a software program for timecard entry. Currently we use Decision Systems for our payroll and accounting. We are looking for a software program that can integrate with our current payroll program, is easy to use and can customize to align with our current practices. The next steps will be to continue to gather pricing information and meet with vendors. It is projected to have a recommendation for the Board by April.

Options

Frontline Education:

We currently use Frontline education for Absence Management and Hiring. This solution has an app or stuff can use a web kiosk.

Annual Software Investment: $8,534

One time implementation: $7,500

Decision Systems:

Our current payroll vendor has a timecard system. This system will integrate with our payroll system.

Time Clock Plus Software:

Annual Software Investment: $9,000 to $18,000

Software is capable of time and attendance along with scheduling.

Alio Time:

This software solution offers flexible clocking options and various ways to access the system for employees.

Tyler's Infinite Visions:

This is a full business process management software that not only offers timecard but financial management and human resources.
