

ATTACHMENT IX-C

ATTACHMENT IX-C:	Long Term Technology Plan
Suggested Motion:	Informational
Recommended Action:	None

The initial phases of putting together a long term Technology Plans have begun. We have held initial meetings with administrators and the technology team. Through those discussions we have used a framework from Future Ready to help develop all of the necessary components of the plan. More detail is still being added and the next phases will be to get input from various other groups such as: principals, teachers and support staff. I envision the plan then being shared at the Curriculum Committee and eventually presented to the Board hopefully in November or December.
