

ATTACHMENT NO. X-D: Design Work for Capron Parking Lot

Potential motion: Move to approve the architect to begin design work for the Capron property

Recommended action: Approve the motion

With the removal of the structures on the new Capron property and the completion of the soil borings and survey, the next step is to begin the design work for the new parking lot. The administration is recommending that we have Greg Stahler (Architect) begin the process of building plans for the new lot.
