ATTACHMENT NO. XI-I:           Technology Purchases

Potential motion:                 None

Recommended action:            Informational

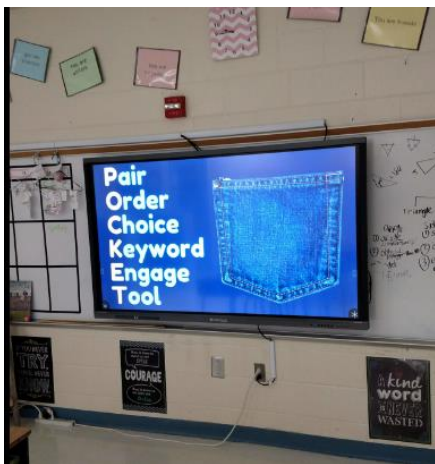

Each year we evaluate classroom AV. This year's goal is to finish refreshing our classrooms that have partially working equipment, or certain models in 7-13 year old range.

For some time now, large touch TV's have been the new standard in the classroom. They are brighter, show more detail, have much better drawing capabilities, and have many features that a traditional projector does not have.

This summer we would like to start replacing out projectors for Tv's in schools that have large replacement needs.

The two schools that have a higher quantity of replacement need are the High School, and Poplar Grove.

High School 13  
Poplar Grove 11

We would also like to place touch tv's in some of our buildings meeting rooms. These rooms do not have any type of tv or projector setups, and rely on shared projectors that are end of life. The Tv's will come with a camera mic system that will allow for group video conferencing.

This need calls for 5 touch tv's of various sizes.

The following buildings would receive Touch Tv's:

NBHS Library

UE: Tv on wheels shared between library and meeting room

MES: Meeting room

CAP: Meeting room

District Office: Meeting room

The cost to make this happen is **\$112,127**
