ATTACHMENT XVI-D: High School Graduation Requirements

Recommended Action: Move to approve the High School Graduation Requirements as presented

Recommended Action: Approve as presented

We have approximately 15-20 students at NBHS that are likely not going to graduate because they will be short elective credits or a science credit. Many of these students were on track to graduate before the pandemic but have struggled for the past year to pass all of their classes.

Our graduation requirement are equal to the state requirements in all areas except science and elective credits.

If the board agrees to change the number of elective credits to 9 ½ and reduce the number of science credits to two (which equals the state) for the Class of 2021, students will be able to earn their diploma and move on to the next part of their lives with a high school diploma. The courses students did not pass would still stay on their report cards and transcripts and would count in their grade point averages.
