## Cost:

5.8 million

## Date:

2021

## Scope:

Football Field  
Running Track  
Baseball Field  
Softball Field

Westville's renovations posed a particular challenge only fit for the most experienced design-build sports contractor. They needed to entrust someone to redesign and shift the location of their existing stadium to fit a new concrete plaza and fitness building, and expanded bleachers, in the extremely limited space they had available.

Having saved capital funds for years and having one shot to get it right, Westville entrusted Byrne & Jones with this huge responsibility. Not to mention the tight schedule it needed to be built within – the project was approved in November 2020, design was completed by January 2021, construction started in February and the new stadium was ready for play by August of 2021, along with a full new turf baseball and softball field. The great success of this project was also awarded the project spotlight in TIPS Purchasing Cooperative's quarterly newsletter.

## Cost:

4.6 million

## Date:

2021-2022

## Scope:

Running Track  
Football Field  
Baseball Field  
Soccer Field  
Tennis Courts

One of Byrne & Jones' best examples of a full athletic site restoration, not only did we need to build them a new track and field, baseball field with a new backstop, new turf soccer field and a new battery of 8 post-tension concrete tennis courts, but we also had to redesign their entire campus drainage to prevent the flooding of their parking lots and neighboring streets and backyards.

Mattoon High School presented an unusual challenge of having poor campus drainage and poor surrounding city drainage, which resulted in Byrne & Jones' design team needing to come up with a three-retention-pond-system and the re-routing of multiple drainage lines to adequately hold and slowly drain water without flooding the new fields and existing parking lots. At the end of the day, the project proved to be a complete success for both the student athlete's needs, and the campus' drainage needs.

SPORTS CONSTRUCTION

# Mount Carmel High School

Mount Carmel, IL

## Cost:

\$2.5 million

## Date:

2022

## Scope:

Football Field  
Running Track

With one of the most notable football stadiums in the state that sits below a massive concrete wall of bleachers next to the Wabash River, Mount Carmel High School entrusted Byrne & Jones to carefully bring their 100-year-old stadium, The Snake Pit, into the 21st century with a full new running track and turf football field with all the necessary accessories and add-ons including new visitor bleachers with a press box and new video board.

## Cost:

2.3 million

## Date:

2019

## Scope:

Soccer Field  
Football Field  
Baseball Field  
Softball Field  
Running Track

One of our first cooperative purchasing projects in the state of IL, Unity High School saw the cost-saving and time-saving benefits of utilizing the purchasing cooperative to hire the most experienced sports construction company in the Midwest. The first school in the state (outside of Chicagoland) to build FOUR synthetic turf fields, Unity installed a new turf football field, turf baseball infield, turf softball infield, and a turf soccer field on their campus, leading the way of the influx of central and southern Illinois schools following the same soon after.

## Cost:

1.7 million

## Date:

2018-2019

## Scope:

Running Track  
Football Field  
Baseball Field  
Grass Softball Field

Okaw Valley's campus presented an unusual challenge where their existing cinder track actually ran through the outfield of their current baseball field (imagine diving for a fly ball into track cinders and gravel). Their wish was to find a way to build a new softball field, baseball field, and all-weather running track in the limited space they had available. By utilizing Byrne & Jones design expertise, we were able to shrink and rebuild their existing baseball field into a natural softball field whose fence now was just short enough to fit their new all-weather track. In addition, we utilized neighboring farmland to build an entirely new baseball field with a turf infield and natural outfield. Being our first cooperative purchasing job in the state of Illinois, Okaw Valley allowed Byrne & Jones to show off our true design-build capabilities.

# Webber Township High School

Bluford, IL

## Cost:

1.5 million

## Date:

2021-2022

## Scope:

Running Track  
Football Field  
Baseball Field  
Softball Field

Utilizing previously un-used land for the support of their athletes, Webber Twp. High School hired Byrne & Jones to design-build a new running track and new baseball and softball fields for their high school campus. As so many schools experience the ever-so-familiar detriment of rainy Midwest springs, Webber Twp. elected to install synthetic turf on the infields of their baseball and softball fields to ensure there are no more rainouts on their ballfields due to flooded infields.

## Cost:

5.3 million

## Date:

2022

## Scope:

Baseball Field  
Softball Field  
Football Field  
Running Track  
Natural Grass Field

After realizing the potential of procurement options other than public bid, Riverton was exploring either to use a Performance Contractor or to hire Byrne & Jones directly through a purchasing cooperative. After heavily exploring both options, Riverton High School found it advantageous to hire Byrne & Jones through a co-op due to the immense cost-savings and our second-to-none sports construction expertise. This is a project that Byrne & Jones was truly able to show our versatility on, including a full turf football field and running track, half turf/half natural baseball and softball fields, a full natural grass practice field, as well as plenty of new concrete and asphalt paving.

## Cost:

2.6 million

## Date:

2021-2022

## Scope:

Softball Field  
Running Track  
Natural Grass Field

Aware of our work nearby at Westville, Unity, and so many others in the Champaign / I-57 corridor, Bismarck looked to none other than Byrne & Jones for the design-build of their new Turf Softball Field and new all-weather running track.

Boasting a “broke-back track,” a wider-style track to fit a larger soccer field within it, Bismarck now has a premier athletic facility for the four-school-co-op to use.

Bismarck has selected Byrne & Jones for phase II of their athletic improvements, which includes demolishing their existing cinder running track and building a new synthetic turf football field to be completed for the Fall 2023 season.

## Cost:

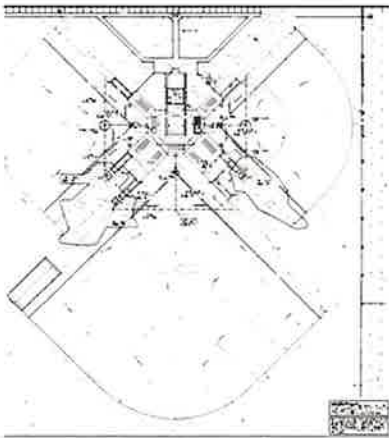

3.5 million

## Date:

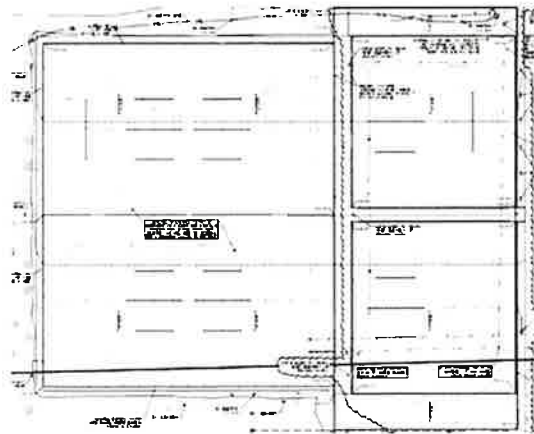

2019-2023

## Scope:

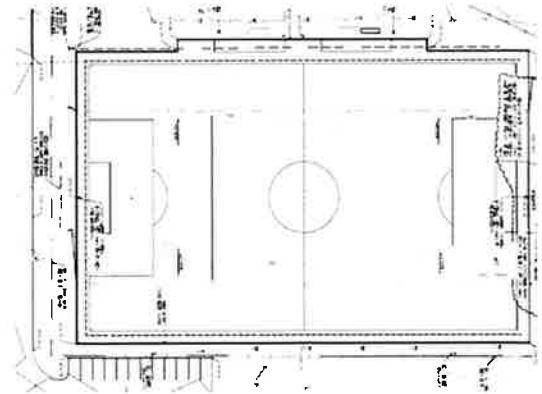

- Softball Fields
- Baseball Field
- Soccer Field
- Tennis Courts
- Football Field

**BASEBALL / SOFTBALL PLANS**

**TENNIS COURT PLANS**

**SOCCER FIELD PLANS**

After selecting Byrne & Jones to complete their turf football field at Howard Fellows Stadium in 2019, LaSalle-Peru High School knew there was only one choice for who to call to build their new sports complex.

Through many pre-planning meetings and by hiring Byrne & Jones through cooperative purchasing, LP was able to determine exactly how to best spend the \$9,000,000 they had allocated for these improvements. All within a one-year timespan, LP and Byrne & Jones will have planned, designed, and built their new baseball/softball complex, turf soccer field, and (12) new tennis courts.
