

## Group VIII Program Request

Teacher Name: Lloyd Roberts Date: 8/19/23

School/Project Location: NBMS

Project Name: D & D Club

1. Briefly describe how students will benefit from this program:

It improves thoughtfulness, teamwork, planning, and creativity. Academically, it improves reading, comprehension, Math (percentages, points, basic skills) and the scientific process (theory, prediction, gather and analyze information, draw conclusion and rethink your theory)

2. Describe the activities of this program:

Students will work as a team to solve puzzles, go on "adventures" that involve characters created by students. They will use dice rolls (percentages) to "battle Monsters" which are adjusted through the use of attributes of the character. Some adventures are pre-created which will require the club members to read the adventure and follow instructions to solve the puzzles.

3. Give a schedule of tentative dates and times for each activity.

Depending on the date of approval. We will start the club as soon as it is approved. We will hold a preliminary meeting to discuss structure and expectations. After that we will have a one-hour meeting once per week (probably every Tuesday) for the whole year.

4. Total hours of project for teacher: 30

Total cost of project: I would like to purchase tshirts for each member. Cost will depend on how many students join. There are no other costs beyond this and my hours since we have all the equipment already (Nothing was damaged because I brought it all home for the summer)
